

QUALCON  
SOLUTIONS

Project Delivery Done Differently

# Our Story

Qualcon Solutions is an innovative telecommunications services company. We believe technology can truly change our lives so we are working with Victoria's most respected Delivery Partners to complete unique projects state-wide.

We are focusing on three key areas that we believe will build our distinct brand within the Australian telecommunications industry.

## INNOVATION

- ▶ We have worked with app developers to digitalise field based documentation. Our clients enjoy the convenience of access to construction data at the click of a button, saving hours of administration.
- ▶ During the build stage of a project progress can be tracked daily, ensuring reliable forecasting and accurate reporting.
- ▶ Using our extensive practical completion experience we utilised existing technology platforms to create an holistic management process that complies with all major service providers. At completion all documentation and photos are supplied using our easy to use online filing system - no more chasing paperwork!

## COLLABORATION

- ▶ We view ourselves as an extension of our client and believe effective collaboration is intrinsically linked to both of our successes. We are constantly exploring new opportunities for Qualcon Solutions to improve our delivery process, resulting in the best project delivery results for our clients.
- ▶ Collaboration starts at the project start-up stage and continues until completion. We sit with our client, discuss their ambitions, project timeframes and tailor our delivery approach to meet their needs. Being on the same page is important to us.

## INTEGRITY

- ▶ To Qualcon Solutions integrity is a huge part of our business approach and our company culture. We strongly believe integrity is the key to longevity in the telecommunications industry and we strive to build strong, long-lasting relationships with clients, contractors and employees.

# Our services

Working with Qualcon Solutions enables a single point of contact for your entire project.

We have a wide range of specialties and in-house capabilities that allows us to take on full responsibility for projects.

Working with Qualcon Solutions reduces client's deployment costs and time to complete the project.

- ▶ *Our services include:*
- ▶ Project Management (Certified Prince2 practitioner)
- ▶ Asbestos removal
- ▶ Pit and pipe installation
- ▶ Cable hauling (Copper & Fibre)
- ▶ Fibre splicing
- ▶ Copper jointing
- ▶ Fibre integration
- ▶ Recoverable works
- ▶ Telecommunication rigging
- ▶ Testing & Tagging
- ▶ Prescribed Industrial Waste transport

Qualcon Solutions has a diverse range of skills, experience and capabilities.

For more details contact us today.

# Innovation. Easy to manage processes.

## Tailored Onboarding

When we onboard all employees and contractors we ensure they have all of the industry standard certificates and insurances.

Using the Flare HR system allows us to easily tailor our onboarding process to match the needs of our clients and because everything is done online these records can be shared at the click of a button.

## In-Field data capturing

Our field crews are supplied with pre-loaded tablets that have every app they need.

The apps give them 24/7 access to our online server (Google Drive) allowing them to upload documentation or photos at any time. Making accessibility convenient has removed one of field based works biggest obstacles - getting paperwork back to the office unscathed.

## Quality management

Qualcon Solutions has a company Quality Management Plan.

As part of our QMP we complete samples of quality control & quality inspections ourselves; we don't expect on our clients to quality control our work for us.

We also quality control completion documents ensuring your experience is simple and problem free.

## Completion documentation

Using his extensive project and completions knowledge, Joseph has created specialised forms in the fastfields app. This approach has been proven to save hours of time by cutting out the administration "middle man".

The completed forms (with accompanying photos) are uploaded to our online server direct from the field. Chasing paperwork is now a thing of the past!

# Field reporting. Simplified.

We've been working tirelessly to create an **easy to use** reporting system

**1** We have worked with fastfields to create simple forms that capture field data in an easy to use app. Reports are easy to obtain and can be downloaded in many popular formats.

**2** Completed forms are sent from the app to our online server for storage. No need for usb sticks or scanning simplifying the reporting process.

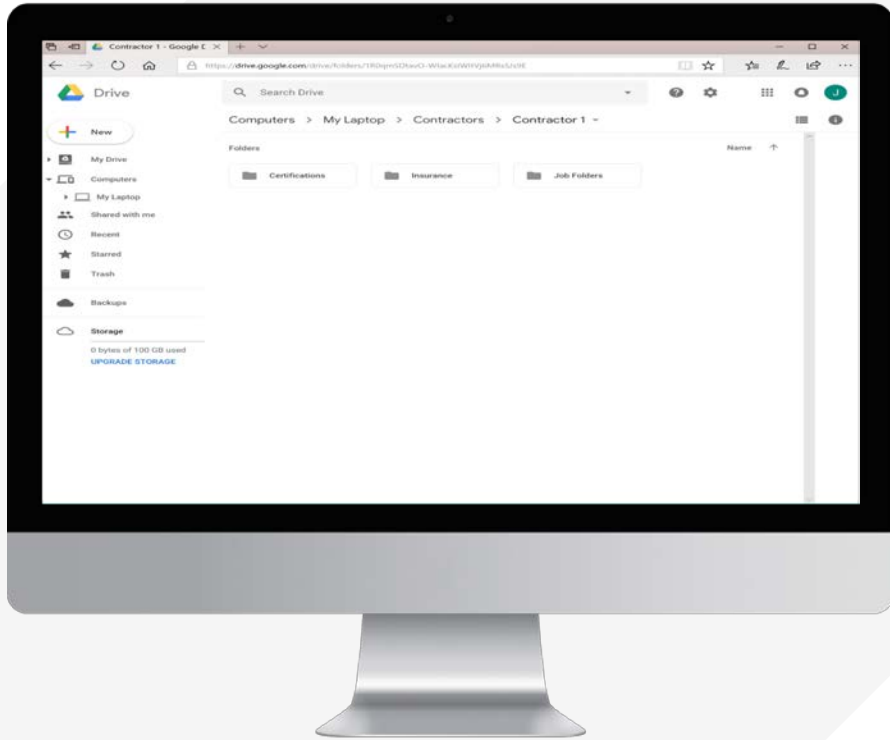

The image displays two mobile devices showing the FastField mobile forms app interface. The tablet in the background shows a 'Pit Installation' form with the following fields: Date (Jun 28, 2018), Installer name (John Smith), SAM I.D (2DNQ-20), Pit identification number (13034649794), Address (20 Smith St, Fitzroy), Existing Pit (A2), ACM Removed? (N/A), Existing Reinstatement (Grass), and a bottom navigation bar with Index, Verify, and Notes icons. The smartphone in the foreground shows an 'Asbestos Removal Control Plan' form with the following fields: Date (Jun 28, 2018), Company licence number (124467789), Company completing removal (Qualcon Solutions), Asbestos removalists name (John Smith), Address of removal (52 Smith St, Fitzroy), Client (nbn), Pit identification number (13008839), Has the asbestos register been sighted? (N/A, Yes, No), and Type of ACM product to be removed. It also has a bottom navigation bar with Index, Verify, and Notes icons.

mobile forms

# Practical Completion

## Made easy

Our clients are our **priority**.  
That's why we have created  
an effective completions system  
that can be utilised 24/7

**01.**

### **Practical Completion made easy**

Field documentation is stored in an easy to follow filing system making practical completion easy. A few clicks and you are all done!

**02.**

### **Online storage**

Our completion files are available 24/7 on Google's beautiful storage platform Google Drive via links provided to our clients.

# We believe in providing the **best** service to our clients, past, present and **future**.

Here are some accolades Joseph our Project Manager has received from stakeholders involved with major projects he completed in the past.

// In my role as Team Leader of Technical Services at the Campaspe Shire I have worked with Joseph and his project team completing the nbn rollout in Echuca, Kyabram and Tongala. I found Joseph and his team very easy to deal with and their field crews complete their work to a very high standard. I would like to thank Joseph and his team for their efforts within the Campaspe Shire.  
– NBN rollout Echuca, Moama, Kyabram, Tongala, 2016.

// As well as the clients endorsement, the quality of Joseph's team work on the recoverable works project was also acknowledged by the MTEW, who were blown away by the speed and quality of the copper cutovers. – Metro Tunnel Early Works, 2017.

# Connect with Qualcon Solutions
